"DESIGN SOLUTIONS MUST BE FOUNDED ON INNOVATION AND CREATIVITY AND BALANCED BY COMMON SENSE AND EXPERIENCE." - BRIAN MACDONALD

KEEPING THE CLIENT IN MIND, ARCHITECTURAL FIRM DESIGN CAYMAN HAS BEEN ARDENTLY DEVELOPING BUILDINGS OF EVERY KIND FOR THE LAST NINE YEARS. Managing Partner of Design (Cayman) Limited Brian Macdonald is a British qualified (RIBA) and registered (ARB) chartered architect and former managing director of OBM International, Turks and Caicos.

Together with a team of highly skilled and innovative designers and consultant engineers, Macdonald has focused equally on sustainable development and creating new design. With good design awareness, Macdonald brings passion and integrity to every project. It comes down to the relationship he crafts with each client. By listening to, guiding and advising his clients on all fronts, Macdonald has built a solid reputation for himself as a manager and his firm in tandem.

"I approach each project as an individual challenge and exciting opportunity to develop the most efficient design response. The design process starts with listening to the clients and developing a creative and logical response to their needs and aspirations for a particular project. Designing for people is fundamental to this process."

Design Cayman has successfully completed a variety of projects through Macdonald's leadership—hotels and resorts; commercial to industrial; civic and luxury residences. The ethos of the firm is to allow the team of imaginative designers to expand their creativity designing buildings, spaces and places that are as striking and innovative as they are socially, economically and environmentally responsible. Macdonald also encourages the inherent differences that come from a diverse team.

By uniting their distinct talents and skills set, Design Cayman is able to provide a turnkey, hands-on approach to architectural design, project management and development that exceeds expectations. Clients are also afforded a complimentary 45-minute diagnostic consultation, which includes information on Design Cayman's professional services, such as:

- Architectural design
- Interior design
- Project management
- Development and master planning
- Strong focus on sustainability
- PAD applications
- Conceptual strategies
- Feasibility studies
- Construction
- Office Renovations
- Drafting Services

Design Cayman also brings a holistic approach to its projects, as the creative team believes that by using natural materials and designing structures that are inspired by Nature, any building can be beautiful. The strength of the team lies in the work they produce: a balance of simple beauty achieved through design using sustainable materials and expert project management. The team is also not limited by the size of projects; the Small Works Division oversees from minor interior renovations to 3000-square-foot residences, at competitive rates.

At the helm of the Small Works Division is Alexander Mena-Hebbert, Design Cayman's senior architectural technologist who ensures that no matter the scale of the project, each client receives the same personalised service offered to larger projects.

No matter the scale or scope of architectural design, the team behind Design Cayman is capable of providing stellar, top-down customer service to any client. Good design really does elevate the human spirit.M
